Essential Medicines Facility

Mission

DNCD is dedicated to improving global health by facilitating the procurement and distribution of essential medicines.

Approach

We leverage collective buying power to negotiate fair prices and ensure consistent supply of critical drugs.

Impact

Our work helps communities worldwide access the treatments they need, saving lives and strengthening healthcare systems.

Solutions

Pooled Procurement

We aggregate demand from multiple countries and organizations to negotiate better prices with suppliers. By leveraging economies of scale, we look to achieve massive reduction in medicine prices.

Order Management

Our logistics expertise ensures timely delivery and efficient distribution of essential medicines. Supported by a network of leading organizations worldwide, we maintain a reliable supply chain

Tech Platform

Our advanced tech platform streamlines the entire procurement process, offering real-time order tracking and complete automation. This ensures efficient management, transparency, and seamless operations

Quality Assurance

Our mission is to provide reliable access to quality-assured treatments by following WHO and SRA standards.

Pooled Procurement

Pooled procurement is a collaborative strategy where multiple entities, such as countries or organizations, combine their purchasing power to buy goods or services in bulk. This approach helps to negotiate better prices, improve supply chain efficiency, and ensure stable and affordable access to essential products, such as medicines and medical equipment. By leveraging collective demand, pooled procurement reduces costs and enhances availability, benefiting all participants involved.

Active Pools

Spinal Muscular Atrophy Pool

The SMA Pool combines the global demand from multiple countries to significantly reduce the cost of life-saving treatments for SMA, covering vital medications like Zolgensma, Spinraza, and Evrysdi. This global pooled procurement initiative ensures affordable and timely access to essential therapies for thousands of affected children worldwide. Join us in this collective effort to provide hope and save lives.

India Pool

India Pool aggregates the annual demand of the major healthcare providers across India, covering more than 500+ critical medications to significantly reduce costs. This initiative ensures affordable and timely access to life-saving treatments for millions, significantly enhancing healthcare outcomes nationwide. Join us in this transformative effort to make essential medicines accessible to all.

Cancer Pool

The 'Cancer Pool' is a global initiative designed to pool demand across over 40+ LMIC, establishing a centralized procurement mechanism to significantly reduce the cost of life-saving cancer treatments. Pool has 50+ essential cancer drugs, carefully selected based on WHO guidelines and expert consultations. By participating in the 'Cancer Pool', countries will secure access to more affordable, high-quality cancer care for their populations.
